## CAT'S BACK

### Upstairs at the Cat's Back/

We're converting a non-theatrical space into a theatre for Wandsworth Fringe. It will have 35 seats and will be very cosy. The stage space is about 6ft deep by 10ft across. Changing space is TBA and we advise artists not to move around more seats than they can move back in a very limited get out time. How you find the space is how you should leave it. The space will have basic lighting and sound, one corded microphone with a stand and a projector screen, which you can use, but be aware that the projection comes from FOH, so it shines onto the stage.

The seats in the venue are a mixture of bar stools, lounge chairs and sofas, no two the same size. The walls of this room are covered in old film posters and the downstairs bar still looks old, retro, untouched.
